

Model 6766R-KIT Four Channel TTL Logic-to-ST Fiber Interface Converter, Desktop

- Converts TTL Logic signals to ST Fiber Optic signals.
- Has screw terminal strips for easy connection of the copper logic signals.
- RoHS Compliant

INTRODUCTION

The Model 6766R-KIT is a high speed TTL digital logic level to fiber interface converter from Electro Standards Laboratories. It translates four input/output logic pairs into four fiber pairs, resulting in a total of eight fiber optic connections. Typical operating speeds are up to 5 Mbps.

Features include ESD protection on all copper interfaces, convenient ST fiber connectors, and logic test points that allow for signal monitoring. Provision for user selectable jumpers for fiber light ON/OFF polarity located on circuit board inside the Model 6766R-KIT enclosure.
