

LineSelect® Model 7190 Double Gang, Wallbox, RJ45, Cat5e Online/Offline Manual Switch

- Allows quick disconnect from network when not in use, providing ultimate security.
- Blocks out intruders.
- An ideal Conference Room Network Isolation & Security Switch.

INTRODUCTION

The **LineSelect®** Model 7190 is a manually operated double gang wall box Online/Offline switch. When in the ONLINE position, the switch **connects** the Computer to the Data Network. When in the OFFLINE position, the switch **disconnects** the Computer from the Data Network. There are two RJ45, Cat 5e ports on the bracket inside the wall box. The RJ45 network cables must be run into the box and bracket before installing in the wall.

FEATURES:

- **Completely isolates the COMMON device from the data network when in OFFLINE position.**
- Online/Offline switch on faceplate.
- Two RJ45, Cat 5e Ports on bracket inside box.
- RJ45 cables must be run into box and bracket before installing in the wall.
- Rated for 10/100/1000 Base-T networks (up to Cat5e).
- High quality sealed switch with self-wiping precious metal contacts.
- All 8 pins of the RJ45 interface are switched via a break-before-make rotary switch.
- Transparent to data speed and format.
- Manual operation via front-panel rotary switch.
- No external power required.
- Custom length RJ45 cables available for your switch installation.
- Lifetime warranty against manufacturing defects.
- ★ **Municipalities, schools, government: This product is on GSA Schedule!**
