

LineSelect® Model 9000 DB25 A/B Switch Module (FFF), Rackmount Configuration

- You can add switch modules to the rack as your system expands!

INTRODUCTION

The **LineSelect®** Model 9000 switch module allows the user to quickly and easily switch a device connected to the COMMON between devices connected to ports A and B. The **LineSelect®** Model 9000 is an open frame module designed to be installed in the Model 9025 Rack.

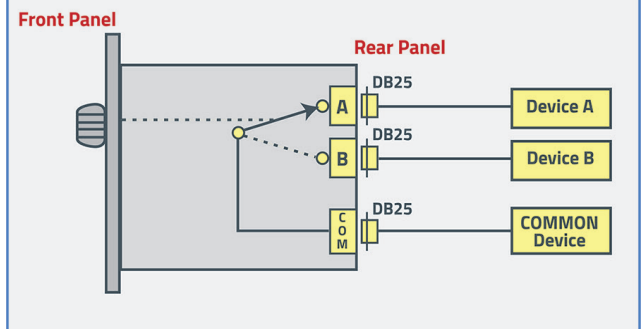

The Model 9025 Rack accommodates up to 8 **LineSelect®** Model 9000's. The Model 9025 is a 3U, full rack size chassis designed to fit in a standard 19" rack.

FEATURES:

- Manually select switch position from front-panel.
- Allows quick connection to any one of two devices from one COMMON device.
- Switches pins 2-25. Pins 1 are bussed thru and tied to chassis lug.
- High quality sealed switch with self-wiping low impedance contacts.
- Eliminates the need to plug and unplug cables.
- No external power required.
- Transparent to data speed and format.
- Attractive anodized aluminum packaging provides EMI/RFI shielding.
- Improves computer network efficiency by allowing sharing of peripherals.
- Custom length DB25 cables available for your switch installation.
- **Lifetime warranty against manufacturing defects.**
- Modular approach to switch requirements allows expansion to more channels on an as-needed basis.
- **Up to eight Model 9000 Switch Modules can be housed in the Model 9025 Rack Chassis.**

LineSelect® Model 9000 DB25 A/B Switch Module Application
