

LineSelect® Model 9028 Single Channel USB 2.0 A/B Switch Module

- Switch between two 2.0 Type-A Devices to one COMMON 2.0 Type-A Device without having to disconnect cables.
- Perfect to connect a device to multiple PC's USB 2.0 Devices.
- Modular approach allows system expansion to meet your needs.

INTRODUCTION

The **LineSelect®** Model 9028 USB 2.0 Switch Module allows the user the capability of sharing a single device connected to the COMMON port among two devices connected to the "A" and "B" ports. The switch may be controlled manually via the front panel rotary switch. The Model 9025 Rack accommodates up to 8 Model 9028 Open Frame Switch Modules. Expand the system of switches by adding modules, as your requirement grows.

FEATURES:

- Allows quick connection to any one of two USB Type-A interface devices from one COMMON device!
- Eliminates the need to plug and unplug cables.
- ***Compatible with Hi-Speed USB 2.0 devices.***
- The switch ports are transparent to all data.
- All (4) pins of the USB interface are switched via break-before-make rotary switch.
- No external power required.
- Up to eight Model 9028 Switch Modules can be housed in one Model 9025 Rack Chassis.
- ***Add more modules having various switch functions as your system grows.***
- Lifetime warranty against manufacturing defects.

SPECIFICATIONS:

PORT CONNECTORS: (3) USB 2.0 Type-A connectors labeled A, and B, and COMMON.

FRONT PANEL CONTROL: (1) Rotary switch allows local switching.

POWER: Manually operated. No power required

DIMENSIONS: 2.0"W x 5.25"H x 7.0"D.
(5.1 x 13.3 x 17.8 cm)

WEIGHT: 0.8 lb.(0.45 kg)

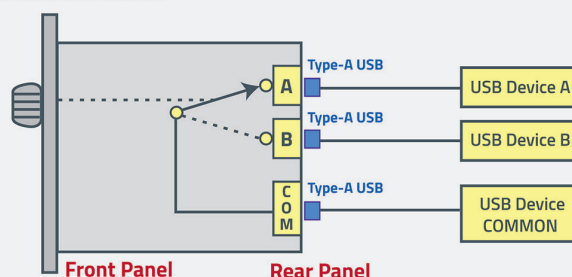

System Expands to meet your needs!

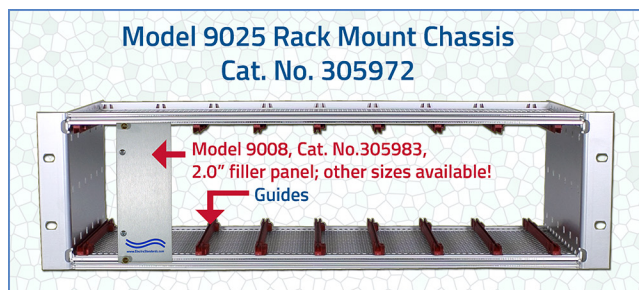

This modular approach to switch system requirements allows expansion to more channels on an as-needed basis. Filler panels are available to attractively cover unused module slots.
